We have moved...

Hayling Island design agency, Capture Design and Print Ltd, has recently moved to new premises in central Hayling. Previously based at Northney Marina, the planned redevelopment of the site has resulted in Capture having to relocate.

Capture has been serving our clients since 2005 and has grown considerably in this time. Our client list consists of small and mid-size local businesses as well as large national and retail organisations. Each and every client is important to us and has contributed to our growth and success.

Our services include graphic design, printing, digital communications, web design, exhibition graphics, marketing support and promotional goods.

Joanna Young, Commercial Director says *"It's certainly mixed emotions as we have loved our time at Northney Marina. This wonderful location has given us the opportunity to grow our client base, expand our services, overcome challenges and achieve a good level of business growth. We have also had the pleasure of meeting and working with some lovely clients. This new chapter represents an opportunity to further grow our client base and support local businesses in their pursuit of success."*

Whilst Capture's location may be changing, one thing will remain constant - our commitment to providing excellent service to our clients and helping them grow their businesses. Our new office opens on Monday 4th June and we look forward to welcoming new and existing clients.

New Address: 78 Elm Grove, Hayling Island, Hampshire, PO11 9EH
